👤 Profile

An engineering mindset for decomposing, modelling, and optimizing systems translates into building performant, visually sophisticated interfaces. Strong foundation in algorithms, data structures, OOP, and problem-solving.

{ } Projects

ShopX - E-Commerce Application (Mobile)

A full-featured cross-platform e-commerce app built end-to-end, from a layered ASP.NET Core REST API to a Flutter mobile frontend.

- Built full shopping flow: product browsing, cart, orders, and banners with bilingual (EN/AR) support
- Integrated FCM push notifications, Google Sign-In, and Supabase for storage and database
- **Stack:** Flutter · Dart · ASP.NET Core · PostgreSQL · Supabase · Firebase

🔗 [GitHub Repository \(includes apk\)](#) 🔗

Student Notification System (Desktop)

A smart desktop tool that automates sending personalized emails to students with their exam hall assignments or grades.

- Automated bulk email delivery, sending hundreds of personalized emails efficiently from imported Excel data
- Implemented student and grade management with full database integration
- **Stack:** C# · .NET Framework · WinForms · ADO.NET · SQL Server

🔗 [GitHub Repository \(includes demo\)](#) 🔗

E-commerce Admin Panel

A cross-platform mobile admin panel for managing an e-commerce store, built with Flutter and backed by a RESTful ASP.NET Core API.

- Managed products, orders, users, and banners with image upload via Supabase Storage
- Integrated FCM push notifications
- **Stack:** Flutter · Dart · ASP.NET Core · PostgreSQL · Supabase · Firebase

🔗 [GitHub Repository \(includes apk\)](#) 🔗

DVLD – Driver & Vehicle Licensing Department (Desktop)

A desktop application for managing driving license records, applicants, and test results end-to-end.

- Built full CRUD operations for applicants, licenses, and test records across a multi-layer architecture
- Implemented license test tracking with result management and status updates
- **Stack:** C# · .NET Framework · WinForms · ADO.NET · SQL Server

🔗 [GitHub Repository](#) 🔗

Portfolio

A personal developer portfolio built as a Flutter Web app, featuring advanced code-driven animations

- Developed custom UI using low-level painting and animation controllers for fluid, code-driven visual effects
- Implemented interactive project showcase with smooth scroll navigation and typing effects

• **Stack:** Flutter · Dart · Flutter Web · CustomPainter 🔗 [Website Link](#) 🔗 [GitHub Repo](#) 🔗

My Notes App – Flutter / Supabase (Mobile)

A clean and responsive mobile notes app with cloud storage and category organization.

- Implemented note creation, editing, and category organization with a clean UI
- Added Google Sign-In and Supabase storage with note and category management
- **Stack:** Flutter · Dart · Supabase

Technical Skills

Programming Languages

C#, C++, Dart

Frontend / Mobile

Flutter, Bloc / Cubit

Core Concepts

OOP, Data Structures & Algorithms, Multi-tier Architecture

Professional Strengths

Debugging, Code Optimization, Analytical Thinking

Backend

ASP.NET Core, ADO.NET, REST APIs, LINQ

Databases

Microsoft SQL Server, T-SQL

Tools

Git & GitHub, Visual Studio, VS Code, Swagger, SSMS

Problem Solving

1000+ challenges solved across CodeWars and other platforms

Education

Bachelor's Degree in Electrical Engineering

University of Science and Technology of Oran

Sep 2021 – Jul 2025

Oran, Algeria

Certificates

- Advanced Data Structures and Algorithms
- Database Management with SQL
- EF SET English Certificate
- Advanced C# and ASP.NET Core
- Object-Oriented Programming (OOP)

Languages

- Arabic (Native)
- English (Proficient)
